About

Product designer with 13+ years of experience across crypto, marketplace, and consumer products. I focus on translating user research and behavioral data into measurable product improvements, especially in complex, transaction-heavy flows.
My work sits between usability, interaction design, visual craft, and close collaboration with engineering teams. I enjoy simplifying flows, setting up the right instrumentation to measure what matters, and driving decisions with evidence rather than assumptions.

Experience

- **Product Designer — Bitpin** Sep 2024 - Jun 2026

Worked on onboarding, deposit flows, and interaction design, with a focus on usability and user trust.
- Owned the end-to-end design of the signup flow, iterating on the experience based on user research.
- Identified trust-related friction in the deposit flow through usability research, informing design improvements.
- Led usability testing sessions with users to uncover friction points and guide design decisions.
- Collaborated closely with engineers to refine interaction details and implementation quality.

- **Lead Product Designer — Pindo** Apr 2023 — Mar 2024

Focused on improving marketplace experiences and simplifying product flows.
- Set up event tracking and data collection for the secure-purchase (escrow) flow — previously unmeasured — enabling the team to grow conversion by 130% (10% → 23%), one of the company's key revenue flows
- Improved interface clarity and usability across different product areas
- Collaborated closely with product and engineering teams through fast iteration cycles

- **Lead Product Designer — Sheypoor** Oct 2018 - Dec 2021

Worked on usability testing, research-driven design improvements, and iterative product refinement.
- Redesigned a core form and introduced a price-signal feature, growing the share of fair-priced listings from 23% to 41%
- Conducted usability testing sessions and translated findings into design improvements
- Helped strengthen research and testing practices within the design process

Earlier Experience

Worked with companies including Alibaba, ZoraQ, Zarrinno, and AutoAbzar across different product and design roles.

Skills

Product Design · UX/UI · Interaction Design · Usability Testing · User Research · Prototyping · Design Systems · Figma · Motion · AI assisted Product Design

Education

B.A. in Industrial Design — Iran University of Science and Technology
