About

Product designer with 13+ years of experience across crypto, marketplace, and consumer products. I care deeply about making products easier to understand and easier to use — especially in places where complexity creates friction for users. My work usually sits between usability, interaction design, visual craft, and close collaboration with engineering teams. I enjoy simplifying flows, improving clarity, and helping teams better understand user behavior through research and usability testing.

Experience

◆ Product Designer — Bitpin Sep 2024 – Present

Worked on growth-related product areas including onboarding, usability improvements, and interaction design.

- Improved and simplified several user flows across the product
- Contributed to signup and onboarding experiments focused on growth and conversion
- Led usability testing sessions with real users to uncover friction points and usability issues
- Helped introduce a more user-centered approach into product and design discussions
- Worked closely with engineers on interaction details and implementation quality

◆ Lead Product Designer — Pindo Apr 2023 – Mar 2024

Focused on improving marketplace experiences and simplifying product flows.

- Improved interface clarity and usability across different product areas
- Collaborated closely with product and engineering teams through fast iteration cycles
- Balanced usability, business goals, and visual quality in product decisions

◆ Lead Product Designer — Sheypoor Oct 2018 – Dec 2021

Worked on usability testing, research-driven design improvements, and iterative product refinement.

- Conducted usability testing sessions and translated findings into design improvements
- Improved user flows based on behavioral insights and real user feedback
- Helped strengthen research and testing practices within the design process

Earlier Experience

Worked with companies including Alibaba, ZoraQ, Zarrinno, and AutoAbzar across different product and design roles.

Skills

Product Design · UX/UI · Interaction Design · Usability Testing · User Research · Prototyping · Design Systems · Figma · Motion · AI assisted Product Design

Education

B.A. in Industrial Design — Iran University of Science and Technology
